

Always on Guard

Take gate guard and location security to the next level.

Now Panther Security provides customers a personalized, technology-driven approach to help address traditional gate guard issues such as:

- **Guard injured** while working on location resulting in legal issues for the operator
- **No guard available** to monitor visitors or record visitor information
- **Guard not alerted** to approaching visitors and is away from their post
- **Weather conditions** restrict or deter guard from performing their duties
- **Guard makes mistake** while recording visitor information resulting in incorrect visitor data
- **No visitor list** is delivered to the operator
- **No video** evidence is provided to the operator

Why can consumers get virtual security for their home, but corporations cannot get the same security for their locations?

Panther Security offers entry monitoring and location surveillance for remote or isolated sites.

Your Panther Security Virtual Gate Guard benefits include:

- Reduced Risk/Liability
- Live Streaming Video
- 24/7 Monitoring of entrance/location
- Self-Contained Power Supply
- Video Archiving/Retrieval
- Can be deployed to any location
- Panther RD/MO/RU
- Full Visitor Detail Report
